# List of research papers written by our customers using our GaN epitaxial wafers

***NTT ADVANCED TECHNOLOGY CORPORATION***
*NTT Atsugi R&D Center, 3-1 Morinosato-Wakamiya, Atsugi-shi, Kanagawa 243-0124, Japan*

NTT ADVANCED TECHNOLOGY CORPORATION (NTT-AT) has been providing gallium nitride (GaN) epitaxial wafers for academic and industrial R&D fields. Nitride semiconductors have capability of high output, high withstand voltage, high frequency, and low loss operation, and its power electric devices are expected to support the low-carbon society. In this document, we present customers' publications from 2020 to 2025 for your references. You can also find our product detail from the link below;
